Amsterdam  
The Hague  
Netherlands

Upon browsing we notice that the speed is considerably slower when using the vpn

Overall vpn is useful and use strong encryption (like AES-256) to protect our data. However vps are not perfect as they can slow down your internet speed, some may keep logs of your activity, and free VPNs might not be fully secure. So, while vpns offer strong privacy and security, they should be used wisely with trusted providers.
